

# Cover Letter

Dear Hiring Team,

I am applying for the SAP ABAP Trainee position at Cognitus. I am a final-year B.Tech CSE student with strong skills in Java, SQL, OOPs, DBMS, and hands-on development experience through internships and real-time projects.

I am highly interested in building my career in SAP because of its global demand, long-term career stability, and strong role in enterprise digital transformation. The opportunity to learn ABAP and grow within Cognitus and IBM's SAP ecosystem is a perfect fit for my career goals.

I am willing to relocate to Mumbai, join immediately, and commit to the required bond. I am eager to contribute, learn, and grow with the organization.

Thank you for considering my application.

Sincerely,

**Shubham Kumar**
